

Maximize Revenue with End-To-End *Decision Intelligence*.

Retail Complexity is Growing

Siloed data leads to missed opportunities and fulfillment inefficiencies erode margins. Uncertain demand has caused unprecedented risks for retailers.

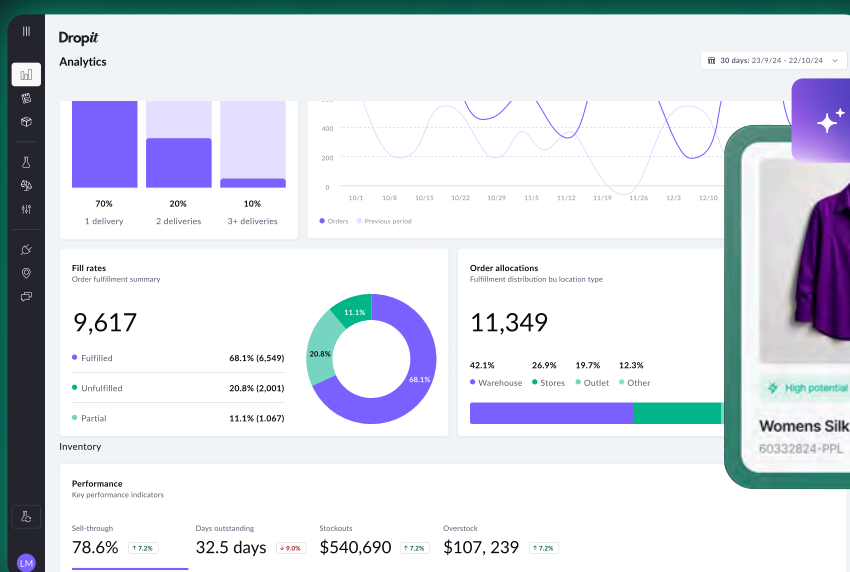

! Out of Stock

We Believe There's a Better Way

What if... every buying decision was powered by real demand signals from every store and you could optimize your entire retail network in one connected system?

This is no longer a "what if." It's what we do.

Introducing: The Dropit Decision Intelligence Platform

Dropit's decision intelligence platform works with your existing technology to drive **optimized inventory planning, allocation, and logistics decisions** across the entire retail ecosystem. Dropit helps **boost revenue, reduce fulfillment costs, and maximize inventory efficiency, including returns.**

Smarter Inventory Planning, Allocation, and Logistics

 Forecast demand by SKU, store and channel.	 Refine size curves by product and store tier.	 Keep best-sellers stocked without overstocking.
 Turn every store into a top performer.	 Preserve stock in high-demand locations.	 Trigger restocks based on sell-through velocity.
 Route returns for maximum resale potential.	 Reduce split shipments and logistics costs.	 Avoid end-of-season markdowns

Measurable Results

It's Time To Make *Every Decision Count.*
